SRQR checklist [1]

No.	Topic	Page/paragraph in manuscript
1	Title	P1, title
2	Abstract	P1-2 abstract
3	Problem formulation	P3, final 2 paragraphs of introduction
4	Purpose or research question	P3 final paragraph of introduction
5	Qualitative approach and paradigm	P3, study design
6	Researcher characteristics and reflexivity	P6, trustworthiness
7	Context	P3-4, study context and participants in the action research
8	Sampling strategy	P4, study context and participants in the action research
9	Ethical issues pertaining to human subjects	P16-17, ethics approval and consent to participate
10	Data collection methods	P5, data collection
11	Data collection instruments and technologies	P5, data collection
12	Units of study	Results, table 1 supplementary table 1
13	Data processing	P5-6, data collection and data analysis
14	Data analysis	P5-6 data analysis
15	Techniques to enhance trustworthiness	P7, trustworthiness
16	Synthesis and interpretation	P8-12, practical guide for patient participation (triangulation of qualitative and quantitative data)
17	Links to empirical data	P9-13, practical guide for patient participation (triangulation of qualitative and quantitative data)
18	Integration with prior work, implications, transferability, and contributions to the field	P13-16, discussion
19	Limitations	P15-16, final paragraph before conclusions
20	Conflict of interest	P17, competing interests
21	Funding	P17, source of funding

QuARC checklist [2]

Factor	**Question**	**Page number/ paragraph**
Context	1. Is the action driven by a practical concern?	P3, final 2 paragraphs
	2. Is there local, national, and international imperative influencing the practical concern?	P3, paragraph 2
	3. Does previous research inform the practical concern?	P3, paragraph 2
	4. Does the AR project draw on previous research?	P4, action research process
Quality of relationships	1. Are those who have articulated the practical concern in the first instance and who also have a stake its resolution included in all the steps of the action research cycle of constructing, planning action, taking action and evaluating?	P4, study context and participants in the action research and action research process

BMJ Publishing Group Limited (BMJ) disclaims all liability and responsibility arising from any reliance placed on this supplemental material which has been supplied by the author(s)

	2. Can the participants be classified as co-researchers?	P4-6, action research process, data collection and data analysis
	3. Is the level of participation of the patients/clients and coresearchers evident at each step of the action research cycle?	P4, action research process
	4. Is the AR project evaluated in terms of the quality of the relationships?	P6, trustworthiness and P15-16, final paragraph before conclusions
Quality of the action research process itself	1. Does the final account demonstrate a rigorous and collaborative engagement in the action research project's design?	P4-6, action research process, data collection, data analysis and trustworthiness and P15-16, final paragraph before conclusions
	2. Does the account demonstrate subsequent enactment of cycles of constructing, planning action, taking action and evaluating?	Supplementary 1
	3. Is enactment of the cycle towards the practical and theoretical objectives transparent and reliable?	Supplementary 1
	4. Is the engagement of the coresearchers evident in shared data analysis and shared reflection?	P4-6, action research process, data collection, data analysis and trustworthiness and P14-15, final paragraph before conclusions
Outcomes	1. Are both forms of outcomes presented (theory (research) and action (practical)?	Results, PPEET results (action) and practical guide for patient participation (research)
	2. Are the outcomes sustainable?	P14, third paragraph
	3. Are the outcomes useful for other action research projects?	P13-15
	4. Does the theoretical outcome contribute to future theory development?	P15-16, fourth paragraph discussion
	5. Is there a reflection on the process of engagement on the cycles by the co-researchers?	P15-16, final paragraph before conclusions.
