Evaluating The Accuracy of Chatgpt in Assessing Students' Essay

School Name: KOLEJ MATRIKULASI SARAWAK
Teacher's Name : CHAN KIN WEI (HEIDI)

Project Category: Academic

School Context

School location: Kuching, Sarawak

Number of students: 167

Student background: Most students achieved excellent SPM results. The majority of the students are from Sibu, followed by Kuching.

Initial Data

Data 1: Overall MUET Result for Session 2024/2025

- Source: **208 matriculation students**
- Finding: **This cohort dominated Band 4**

Data 2: MUET Result focusing on Writing Skill for Session 2024/2025

- Source: **208 matriculation students**
- Finding: **69% were Band 3 and below for MUET 800/4 Writing paper**

Data 3: Session 2025/2026 students' essay using 800/4 Session 1 2025 MUET Paper

- Source: **40 sample students**
- Finding: Majority Band 3.5, some Band 3 or 2.5 and only a few Band 4

Problem Statement

- 47.5% of the 40 matriculation MUET students achieved Band 3 or below in Writing paper skills (800/4). This writing skill is crucial to enable students to achieve a better overall Band score and secure offers for their desired courses at university. Lecturers need to mark students' essays more quickly and provide constructive feedback to help students achieve better scores.

Planning: Logic Model

INPUT

- **Implementation Personnel / Expertise**: 1 PSELF Lecturer (Chan Kin Wei) and 1 Buddy / Superior (Syafiq bin Rasulan) at Sarawak Matriculation College.
- **Target Group**: 40 matriculation sample students.
- **Duration**: 3 months
- **Equipment / Technology**: Smartphones/tablets/ laptops, ChatGPT application, Google Lens, and custom ChatGPT prompts.

ACTIVITY

Activity 1 (Basic Prompting Practice): Students learn to use ChatGPT to evaluate 3 of their own essays from exercise books using provided prompts (e.g., *Grade my essay based on MUET pitch at B2 level*, *Check my grammar sentence by sentence*, *Improve my Essay to B2 level*).

- **Activity 2 (Session 3 2024/2025 Essay Practice)**: Students write a handwritten essay based on the MUET Session 3 2024/2025 paper in 1 hour 15 minutes, digitize it via Google Lens, and evaluate it using ChatGPT.
- **Activity 3 (Session 2 2025/2026 Essay Practice)**: Students write a handwritten essay based on the MUET Session 2 2025/2026 paper in 1 hour 15 minutes, digitize it via Google Lens, and evaluate it using ChatGPT.
- **Activity 4 (Actual Session 3 2025/2026 Exam Essay Reflection)**: Two days after sitting for the actual examination, 40 students rewrite their MUET Session 3 2025/2026 essay, digitize it using Google Lens, and evaluate it using ChatGPT.

OUTPUT

- **Activity 1 Output**: 100% of the 40 students successfully used ChatGPT to assess their essays according to the given prompts.
- **Activity 2 Output**: 100% of students submitted handwritten essays and received immediate real-time feedback before the end of the 2-hour class.
- **Activity 3 Output**: 100% of students submitted handwritten essays and received immediate real-time feedback before the class ended.
- **Activity 4 Output**: 100% of students resubmitted handwritten essays reflecting on their actual exam performance; 38 out of 40 students received ChatGPT band scores consistent with their actual MUET results.

OUTCOME

- **Rapid Marking**: Every essay written by the 40 students is evaluated on the day of submission using AI assistance.
- **Constructive Real-Time Feedback**: 40 students receive comprehensive, real-time comments regarding grammar, sentence structure, score justifications, and actionable suggestions for improvement on the same day.
- **Self-Directed Learning**: Students practice essay writing independently as often as desired without waiting several days for lecturer grading.
- **Tool Validation**: Confirms that using ChatGPT as an essay evaluation tool is valid and effective when guided by structured assessment prompts.

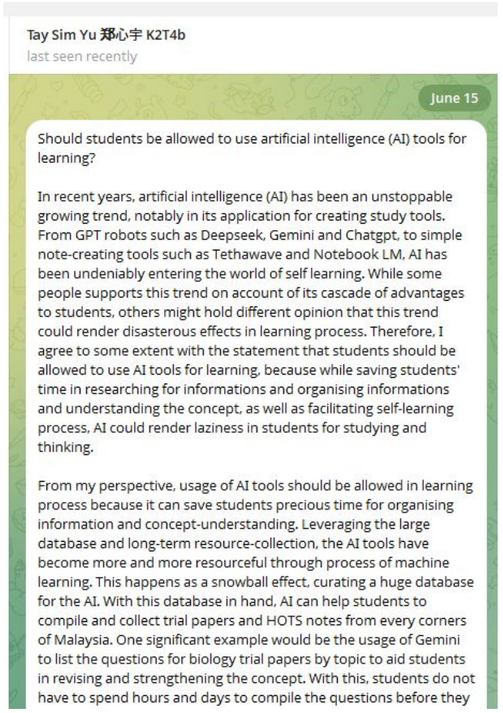

IMPACT

- **Improved MUET Results**: A higher proportion of students achieve MUET Band 4.5 and above overall.
- **University Admissions**: Students successfully secure admission into their preferred degree programs (e.g., STEM courses) at university.

Self-Directed Revision: Students analyzing AI feedback

Outcomes and Next Steps

Latest Data

Essay	Outcomes
Session 1 2025 Actual Muet Writing Paper	17.5% (7 students scored Band 4 and above)
Session 2 2025 Actual Muet Writing Paper	22.5 % (9 students scored Band 4 and above)
Session 3 2025 Actual Muet Writing Paper (Sesi Khas)	12.5 % (5 students scored Band 4 and above)

Final Outcome
95% (Exact Band Match) 5% (Minor Variation)

Next Steps

1. **Cohort Expansion (July – October 2026):** Replicate and scale the intervention for the incoming **2026/2027 Semester 1 Matriculation Cohort** using a streamlined "Replicate & Duplicate" model over their 4-month preparation timeline.
2. **Google Sites Student E-Portfolios:** Require students to maintain individual Google Sites portfolios to log weekly essays, ChatGPT evaluation reports, and revision iterations over 16 weeks for lecturer accountability and progress tracking.
3. **Integrated Skill Enhancement (Speaking + Writing):** Expand the prompt framework to combine Speaking (800/2) practice alongside Writing (800/4) during interactive language sessions.
4. **Departmental PLC :** Continue collaborating with department colleagues and my Buddy lecturer using the color-coded Excel tracking dashboard to visually monitor student band shifts across 16 weeks.
